**Local District Adds 7 New Elementary Schools**

During 1955-56 construction was started on seven new elementary schools. Two of these schools, Arlington and Sepulveda, will be occupied on opening day, September 13. Meadow park and Anza are scheduled for completion by January 15, 1957. Parkway will be completed in February or March, 1957.

The seven new schools will house a total of 4,000 children on single session. This represents an increase in elementary school facilities of approximately 25 per cent. At the same time, the growth in elementary school enrollments has exceeded 25 per cent; therefore, little or no gain has been made in solving the problem of double sessions.

It is for this reason that the Board of Education has made the decision to seek state loan money in an attempt to secure enough building money to

floor of the gymnasium will be available in October.

Grading and site development are virtually complete at South high. The working drawings on the first group of buildings are finished and are being checked by the State Division of Architecture. Bids will be advertised as soon as the plans have been checked and approved.

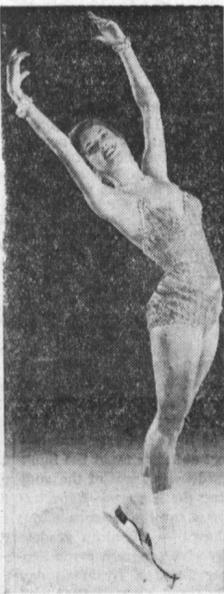

An architect has been appointed to develop plans for the first major addition to North high. The actual work on this project will get underway during this fiscal year.
